Notification

Sachivalaya, Gandhinagar, 14th October, 1994.

INDIAN ELECTRICITY ACT, 1910.

No. GU-94-19-AEC-1691-4208-K.-WHEREAS the Ahmedabad Electricity Company Limited, holder of the Ahmedabad and District Electric License 1944 (hereinafter referred to as "the Licensee") has approached the State Government for revision of the existing conditions of supply and miscellaneous charges;

And whereas the Gujarat Electricity Board and the local authority concerned have been consulted by the State Government in this behalf;

Now, therefore, in exercise of the powers conferred by sub-section (2) of section 21 of the Indian Electricity Act, 1910 (9 of 1910), the Government of Gujarat hereby gives previous sanction to the Licensee to make the revised Conditions of Supply and Miscellaneous Charges attached herewith in place of the existing Conditions of Supply and Miscellaneous Charges of the licensee.

CONDITIONS OF SUPPLY AND MISCELLANEOUS CHARGES

P A R T - I

Conditions of Supply

1. Definitions - (1) Throughout these Conditions of Supply and Miscellaneous Charges, unless the context otherwise requires; (a) "applicant" means a person who intends to become a consumer of the Licensee by submitting an application to the Licensee for this purpose; (b) "billing period" means the period between the date of one normal meter reading required to be obtained at the consumer's premises and the next such reading to be obtained at such intervals or times as the Licensee may specify from time to time; the date of reading of a consumer's meter at the commencement of his supply as a new service being deemed for the purpose of this definition to be a normal meter reading date; (c) "connected load" means the sum of the rated capacities of all the consuming apparatus installed at the consumer's premises and actually connected to the system of the Licensee and it shall be calculated in kilowatts. If some or any of the apparatus is rated in brake horse power, the rating of such apparatus shall be converted into kilowatts on the basis indicated in Part II of these Conditions of Supply and Miscellaneous Charges; (d) "installation" means the whole of the electric wires, fittings, motors and apparatus erected and wired by or on behalf of the consumer on one and the same premises; (e) "sanctioned load" means connected load except that it shall include only such load which has been duly examined and tested by the competent staff of the licensee, pursuant to the submission to the licensee of the consumer's licensed electrical contractor's completion and test report for the installation as required under Condition No.7 of this part; (f) "the Act" means the Indian Electricity Act, 1910 as in force from time to time; (g) "the Licensee" means the Ahmedabad Electricity Company Limited or its permitted assigns.

1.(2) All other words and expressions used herein and not defined shall have the meanings respectively assigned to them in the Act, and the rules made thereunder.

2. Requisition for supply - (a) A requisition for supply of electrical energy under Clause VI of the Schedule to the Act, shall be made in the Form attached hereto (Annexure 'A') of which copies are obtainable from the Licensee free of cost. The requisition shall be signed by the owner or occupier of the premises for which the supply is required. Any assistance or information required in filling up the form will be given to the applicant at the local office of the Licensee.

(b) If the supply is required for motive power, the applicant shall state.

- (1) the purpose for which the motors are required, and
- (2) the brake horse power of each motor.

(c) A requisition under Clause V of the Schedule to the Act, requiring the Licensee to provide distributing mains throughout a street or part thereof shall be made in the form of Annexure "B" attached hereto.

(d) Requisition for supply or additional supply of electrical energy required by the applicant at high voltage and extra high voltage shall be made in the form of Annexure "C" attached hereto available at the Licensee's Head Office, copies of which are obtainable from the Licensee free of cost.

3. Agreement for supply - The applicant may be required by the Licensee to sign an Agreement in the form marked Annexure "D" hereto appended.

4. Service lines - (a) The Licensee shall lay free of charge a service line upto a length of 30.50 metres from his nearest distributing mains outside the limits of the property in respect of which the requisition is made provided the premises for which supply is requisitioned are or were not receiving supply. Any length in excess of 30.50 metres, as defined above and the whole of the service line within the limits of the property in respect of which the requisition is made shall be paid for by the applicant.

(b) The method of construction of the service line, whether overhead or underground, the quality of materials and the size of conductors to be used and the route outside the applicant's property shall be determined solely by the Licensee.

5. Notice for fixing services, meters, etc. - (a) The applicant must give atleast one month's notice before the supply is required. Upon receipt of a requisition, seven clear days' notice shall be sent to the applicant or to the Licensed Electrical Contractor acting on the applicant's behalf or his representative to meet the Licensee's representative at the applicant's premises for the purpose of inspecting the premises and fixing the point of entry of the supply, mains and the position of the mains, cut-outs and meters etc. The position shall be such that the Licensee's representative may have ready and easy access to the service apparatus. The Licensee shall in no case fix his meters and cut-outs, nor allow the same to remain in any position which entails entry by his representatives into 'purdah' or religious quarters or lavatories and bathrooms. Should the cut-outs and meter board be fixed in a locked room or enclosures, the necessary keys must be kept available on the premises.

(b) The service line once laid shall not be interfered with or shifted from one place to another. The consumer shall as far as circumstances permit take precautions for the safe custody of the equipments in his premises and belonging to the Licensee. On failure of this, the Licensee reserve the right to remove the service and meters after giving seven days' notice to the consumer.

(c) Consumers supplied with low or medium voltage electrical energy shall provide and maintain a dry wall, not less than 20 centimeters thick, or such other structure approved by the

Licensee, on which the Licensee's meter board and service cut-out will be supported and shall provide and maintain adequate protection for the meter board from ingress of water and from tampering and mechanical damage.

6. Quotations for laying service lines, service line alterations, etc. - (a) The position for the service having been determined as provided in Condition 5 above, the Licensee shall thereafter submit to the applicant a quotation of the estimate of the charges to be borne by him in respect of the work to be carried out and advise him of other conditions to be complied with. The applicant shall be required to deposit the estimated amount with the Licensee before the service is laid. The deposit having been duly paid and the other conditions complied with, the work shall be carried out. On completion of the work the final charges of the service line to be borne by the applicant will be determined and the amount deposited by him will be adjusted against these charges, the balance being recovered or refunded to him, as the case may be. If, for a group of applicants, there is a balance amount of service line charges recoverable from them, it will be reflected in equal proportion as an arrear in the energy bills of all the services of the group for the purpose of recovery. In the event of failure to pay such charges, the consumer's supply will become liable for disconnection under section 24 of the Act. Other conditions being equal, service lines shall, as far as possible, be laid in the order of the dates of compliance by the applicants with the terms quoted by the Licensee therefor.

NOTE- The service line, notwithstanding that a portion of the charges for its provision has been paid for by the applicant, shall remain the property of the Licensee by whom it is to be maintained and the Licensee shall have a right to use it for the supply of energy to any other person by tapping the service or otherwise.

(b) If a consumer desires to have the position of the existing service line altered in the same premises, the Licensee shall carry out the work at the cost of the consumer.

(c) After an estimate for providing a service line has been submitted to the applicant or the consumer, if such applicant or consumer desires to have his estimate revised for his own convenience, a fee for giving such revised estimate shall be charged for as prescribed under item No.2(b) of Miscellaneous Charges in Part II of these Conditions of Supply.

7. Wiring on Consumer's premises - (a) For the protection of the consumer and the public generally, it is necessary that the wiring on the consumer's premises should conform to the Indian Electricity Rules, 1956 as may be in force from time to time and the Rules, of the Fire Insurance Company in terms of which the building is insured wherever applicable and be carried out by a Licensed Electrical Contractor. The consumer should submit to the Licensee his Licensed Electrical Contractor's Completion and Test Report for the installation. A form for this purpose shall be supplied by the Licensee.

(b) As required by rule 45 of the Indian Electricity Rules, 1956, no electrical installation work (including additions, alterations, repairs and adjustments to the existing installations), except such replacements of the lamps, fans, fuses, switches, low voltage domestic appliances and fittings, as in no way alter the capacity and character of the installation, shall be carried out upon the premises on behalf of any consumer or owner, except by an Electrical Contractor, licensed by Government in this behalf and under the direct supervision of a person holding a certificate of competency issued by Government. Any person committing a breach of the said rule 45 shall render himself liable to punishment under rule 139 of the said rules.

8. Apparatus on consumer's premises - (a) The consumer shall furnish to the Licensee full particulars of all electrical plant and consuming apparatus to be installed by him. The design and operation of all plant and apparatus shall be such that it shall not interfere with the safety or efficient working of the Licensee's electric supply lines or other works for the supply of energy by the Licensee to any other consumer.

(b) To meet with the load requirement of a consumer or a group of consumers as well as to keep the voltage drop within the permissible limits, technically if the Licensee feels it necessary to establish a substation, then the consumer may provide either a suitable plot or substation building within his premises as per the specifications and normal terms and conditions of the Licensee. The rent shall be fixed and paid by the Licensee.

(c) All transformers, switchgears and other electrical equipments belonging to the consumer and connected to the mains of the Licensee shall be maintained to the reasonable satisfaction of the Licensee.

(d) In the case of high voltage and extra high voltage consumers, switchgear of adequate rupturing capacity together with suitable protective devices as required under Rule 50 of the Indian Electricity Rules, as prevailing from time to time, and approved by the Licensee, shall be used so as to afford full protection to the Licensee's apparatus placed on the consumer's premises.

(e) If any consumer adopts any electrical appliance which is likely to affect injuriously the supply to other consumers or uses the energy supplied or deals with it in any manner so as unduly or improperly to interfere with the efficient supply of energy to any other person by the Licensee, or fails to keep in proper order any meter belonging to him by which the supply is registered, the Licensee may discontinue the supply so long as such an appliance is so adopted or the energy is so used or dealt with, or the meter is not kept in proper order, as the case may be, after giving seven clear days' notice.

(f) Rules 61(A) of Indian Electricity Rules, 1956

The supply of energy to every electrical installation other than low voltage installation below 5 kw and those low voltage installation which do not attract provisions of Section 30 of the

Indian Electricity Act, 1910, shall be controlled by an earth leakage protective device so as to disconnect the supply instantly on the occurrence of earth fault or leakage of current:

Provided that the above shall not apply to overhead supply lines having protective devices which are effectively bonded to the neutral of supply transformers and conforming the rule 91 of Indian Electricity Rules, 1956.

Rule 71(ee) of Indian Electricity Rules, 1956

An earth leakage circuit breaker of sufficient rating shall be provided on the low voltage side to detect the leakage in such luminous tube sign installations.

Rule 73(ee) of Indian Electricity Rules, 1956

Notwithstanding the provisions of Clause 3, earth leakage circuit breaker of sufficient rating shall be provided on the low voltage side to detect the leakage in such X ray installations.

9. Inspection and testing of installation by the Licensee -

(a) for low voltage and medium voltage installation - (i) Upon receipt of the Completion and Test Report for the installation, the Licensee shall notify to the Licensed Electrical Contractor and/or to the applicant the time and the date when the Licensee's representative proposes to inspect and test the installation. It will then be the duty of the applicant to arrange to keep the premises open and to see that a representative of his Licensed Electrical Contractor is present at the time of inspection to give the Licensee's representative any information required by him concerning the installation.

(ii) No connection shall be made until the applicant's installation has been inspected and tested by the Licensee and found satisfactory. No charge shall be made for the first test carried out by the Licensee, but if subsequent inspections and tests are required to be done due to faults disclosed at the initial inspection or due to the failure of the applicant's Licensed Electrical Contractor to attend the test at the appointed time as required under (i) above or because facilities for inspection and test were not arranged or due to the installations not being completed, each such inspection and/or test shall be charged for as prescribed under item 5(a) of the Miscellaneous Charges in Part II of these Conditions of Supply.

(iii) Before taking the insulation test of the installation, the wiring must be complete in all respects. All fittings, whether incandescent lamps, fans, motors, heating, cooking or other apparatus, must be connected to the conductors and all fuses must be in place and all switches switched in the 'ON' position before the tests are carried out. Temporary wires or fittings or dead ends should not be included in the installation.

(iv) The Licensee shall not connect with his works the installation or apparatus on the premises of any applicant for supply unless he is reasonably satisfied that the connection will not, at the time of making the connection, cause a leakage from that installation or apparatus of a magnitude detrimental to

safety. Compliance with this rule shall be checked by measuring the insulation resistance as provided below :-

At a pressure of 500 V applied between each phase conductor and earth for a period of one minute, the insulation resistance of medium and low voltage installation shall be at least 1 Megohm or as specified by the Indian Standards Institution from time to time.

(v) The insulation resistance between the poles should be atleast half the insulation resistance to 'earth'.

(vi) If the Licensee declines to make a connection under the above provisions, it shall serve upon the applicant a notice in writing stating the reason for so declining.

(b) For high voltage and extra high voltage installations -

(i) After completion of the high and extra high voltage installations in all respects, the applicant shall procure and submit to the Licensee, a certificate issued by the Electrical Inspector, Government of Gujarat, in token of his approval of the installation, thereafter and on completion of all other requirements, the Licensee may inspect and test the installation as provided under the Indian Electricity Rules, 1956 in force from time to time and shall permit its connection if found satisfactory. To recommence supply to a high tension service connection which remains disconnected for one year or more, approval in writing of the Chief Electrical Inspector to the State Government should be obtained.

(ii) Manufacturer's Test Certificate in respect of all high and extra high voltage plant, switchgear, apparatus and equipments, shall be produced by the applicant, if required by the Licensee.

(iii) If the Licensee declines to make a connection under the provisions of clause 9(a)(iv) he shall serve upon the applicant a notice in writing stating his reason for so declining.

10. Extensions and alterations - (a) After the supply of energy has been commenced, should the consumer desire to increase the number or size of lights, fans, heaters, cookers, coolers, air-conditioners and motors etc. on his premises, he shall requisition additional supply in the relevant prescribed form, duly signed by the registered consumer as per the records of the Licensee, whereafter the Licensee shall submit to the consumer a quotation of the estimate of the charges to be borne by the consumer for such alteration in the service line, service apparatus, meters etc. as may be necessary.

After the consumer has deposited the amount of the estimated charges of the alterations and has complied with such other conditions as may have been notified to him, the Licensee shall carry out the necessary work of alteration to the service line etc. In the meantime, the consumer will arrange for his Licensed Electrical Contractor to submit on completion of such addition to the installation as may be necessary, Test Report of the installation in accordance with Condition 9 above, and on receipt of this Report, the Licensee shall inspect and test the extension

in the consumer's installation prior to switching on power supply to such extension .

(b) If the consumer wishes to carry out alterations in his installation without increasing its capacity, he shall send a Requisition Form duly filled in for approval of the Licensee. On receipt of such approval, he may instruct his Licensed Electrical Contractor to carry out the necessary alterations and to submit a Test Report to enable the Licensee to inspect the installation prior to switching on the power supply to the extension.

(c) For the duration of the period in which alterations, additions or repairs are being executed, as required under sub-conditions (a) and (b) above, supply to the circuit which is being altered, added to or repaired, must be entirely disconnected and it shall remain disconnected until the alterations, additions or repairs have been tested and passed by the Licensee. Failure to do so shall render the supply liable to be disconnected under clause (d) of the second proviso to sub-clause 1 of Clause VI of the Schedule to the Act.

11. Licensee's equipments on consumer's premises - The consumer shall, as far as circumstance permit, take precaution for the safe custody of the Licensee's equipment on his premises and shall not interfere with or allow anyone to interfere with Licensee's meters or other apparatus in any way. If the Licensee's seals placed to protect his apparatus and/or meters are found broken or his equipment or meters interfered with, the consumer shall render himself liable to pay for the damage to or loss of Licensee's equipment in addition to a penalty under rule 138 of the Indian Electricity Rules, 1956.

12. Failure and interruption of supply - (a) Should at any time the Licensee's service fuse or fuses fail, notice thereof should be sent to the Licensee; consumers are not allowed to replace these fuses. Licensee's representatives are instructed not to carry out any repairs to the consumer's installation except replacement of consumer's main fuses at his request and responsibility.

If a representative of the Licensee is called to the consumer's premises on account of failure of supply and such failure be due to any cause other than a fault in the Licensee's apparatus not attributable to the consumer's installation or the consumer's negligence in not affording proper protection to the apparatus, the consumer will be charged a fee for the attendance of the Licensee's representative as mentioned in item 4(e) in Part II of these Conditions of Supply and Miscellaneous Charges in the case of low or medium voltage supplies.

(b) In the case of high voltage and extra high voltage consumers, should the Licensee's high voltage switch or extra high voltage switch, as the case may be, controlling their supply trip at any time, notice thereof should be sent to the Licensee and the consumer shall not reset the switch unless permitted by the Licensee to do so.

(c) The Licensee shall not be liable for any claims for loss, damage or compensation whatsoever arising out of failure of supply when such failure is either directly or indirectly due to failure in bulk supply, breakdown, war, mutiny, civil commotion, riot, strike, lockout, fire, flood, tempest, lightning, earthquake, or other forces of nature, accident or cause beyond his control.

(d) The Licensee may temporarily interrupt supply to consumers to enable work to be carried out on his supply system. Wherever possible, a notice of such interruption will be given to the consumer concerned.

13. Access to premises and apparatus - Employees duly authorised by the Licensee are entitled, at all reasonable times, to enter upon the premises, after informing of their intention to the occupier, to which energy is supplied for inspecting, testing, repairing, altering, tapping, removing or replacing the meters, electric supply lines and for reading the meters and also for other purposes connected with the apparatus belonging to the Licensee. If the consumer, refuses or fails to give reasonable facilities for such entry and performance, the Licensee may, after the expiry of twenty four hours from the service of notice in writing to the consumer, cut off supply to the consumer for so long as such refusal or failure continues but for no longer. Restoration of supply will, however, be effected, only after the corresponding charges in accordance with Part II of these Conditions of Supply and Miscellaneous Charges are paid by the consumer. Notwithstanding the Licensee's right to obtain access to the consumer's premises for the purposes aforementioned, the Licensee may require the consumer to have the position of the existing service line altered in the same premises at the cost of the consumer so as to enable the Licensee to get access to the premises and apparatus therein at all reasonable times.

14. Accuracy of meters - (a) Should the consumer dispute the accuracy of any meter which is not his own property, he may, upon giving notice and paying the prescribed fee, have the meter tested by the Licensee or the Electrical Inspector, Government of Gujarat, in accordance with section 26 of the Act. In the event of the meter being tested by the Licensee and found to be beyond the limits of accuracy as prescribed in the Indian Electricity Rules, 1956 the testing fee shall be refunded and the amount of the bill adjusted in accordance with the test taken with respect to the meter readings of the three months prior to the month in which dispute has arisen, due regard being paid to the conditions of occupancy during the period. In the event of the test being undertaken by the Electrical Inspector, Government of Gujarat and the meter being found to be incorrect, the period not exceeding six months during which the meter shall be deemed to have been incorrect, and the amount of energy supplied to the consumer during this period shall be decided by the Electrical Inspector, Government of Gujarat, whose decision shall be final. Rent for the meter for the period if it is found inaccurate will not be charged by the Licensee.

Where the meter is the property of the consumer, the Licensee will install it only if it meets with the necessary requirements and it shall be the consumer's responsibility to

keep the meter correct. In default of his doing so, the Licensee may cease to supply energy through the meter after giving the consumer seven clear days' notice and adjust the consumer's account as may be necessary after testing the meter.

The Licensee may remove any meter for the purpose of testing it in his laboratory and replace it by a tested one after informing the consumer.

(b) In the event of any meter being out of order or ceasing to register the consumption of energy, the registration during the period in which such cessation is observed to have taken place shall normally be assessed according to the average registration during the preceding period not exceeding three months or two billing periods, whichever is longer, consideration being given to conditions of occupancy during the periods in question. Should sufficient data be not available for determining such average, the assessment shall be based on the average consumption during the succeeding period of three months or two billing periods, whichever is longer.

15. Security Deposits - (a) The consumer may be required by the Licensee to tender a security deposit in cash for anyone or more of the following purposes.

- i) For payment of bills for energy supplied by the Licensee to the consumer including any other sum due by the consumer to the Licensee under these Conditions of Supply and Miscellaneous Charges, as prescribed under item No.7(a) of the Miscellaneous Charges in Part II of these Conditions of Supply.
- ii) Towards the minimum two years' guaranteed revenue under Clause V and/or VI of the Schedule to the Act as prescribed under item No.7(b) of the Miscellaneous Charges in Part II of these Conditions of Supply.
- iii) Towards the value of the meters and other apparatus of the Licensee installed on the consumer's premises.

(b) Interest shall be allowed on security deposits at a rate equal to the Reserve Bank Rate ruling from time to time plus two percentum.

(c) No interest shall be allowed on deposits lodged against the cost of service lines or bills for temporary supply as the account is only of a temporary nature.

(d) The Licensee shall be at liberty at any time to apply any security deposited with him towards payment for or satisfaction of any sum which shall become due or owing by the consumer. However, nothing in this clause shall prejudice any other remedy to which the Licensee may be entitled for the recovery of any sum so due or owing.

16. Notice of vacation of the premises - (a) Consumers about to vacate their premises or intending to keep the premises temporarily locked for a period of a month or more or during the billing period should give to the Licensee seven clear days' notice in writing and arrange for facilities to enable the Licensee to record meter readings and to disconnect supply to the premises, when necessary; otherwise the Licensee cannot guarantee that the meter readings will be taken on the required date to enable the accounts to be submitted to the consumers. Failing to give such notice and facilities for meter reading and/or disconnecting supply to the premises, the consumer shall be held responsible for energy consumed on the premises till such time as the Licensee is able to disconnect the supply. Non-readings of meters shall not absolve the consumer from his liability to pay minimum/fixed/maximum demand charges as may be applicable in accordance with the Licensee's tariff schedule in force from time to time and/or minimum guaranteed revenue during the period the consumer has undertaken to take supply upon presentation of a bill therefor.

Moreover as a consequence of the non-reading of meters on account of the consumer's premises being found closed or access to the meters being not available, the Licensee shall be entitled to submit a bill for the supply of energy on assessed basis for the relevant billing period and the consumer shall be liable therefor subject to the subsequent adjustment of the account after the meter readings are obtained and also subject to the condition that in all such cases, it will be presumed that as and when the meter reading is last obtained, the consumption, if any, recorded by the meter is the consumption during the last billing period and not the total consumption spread over the preceding billing periods, when the meter was inaccessible. The basis of the aforesaid assessment shall be the average monthly consumption during the preceding three billing periods, and when such data is not available for determining such average, the assessment shall be based on the consumer's connected load.

(b) In the event of the consumer failing to pay the aforesaid minimum/fixed/maximum demand charges or the charges under assessed bills or charges under minimum revenue guarantee, his supply shall be liable to be discontinued after serving due notice upon him by the Licensee.

(c) If the meter installed at the service of a consumer remains inaccessible continuously for a period of four months or two billing periods, whichever is lesser, on the prescribed normal meter reading dates of that service, such a service will be liable to be disconnected after serving upon the consumer 24 hours' prior notice for obtaining access. Such a service will also be liable to be removed at the cost of the consumer in case the consumer fails to make access available to the Licensee's representatives for a continuous period of 12 months on the normal meter reading dates of his service, provided that the powers under this clause shall not be exercised by the supplier without having the personal verification of the non-access to the meter by an Inspector/Supervisor/Officer of the Licensee authorised in this behalf.

(d) In the case of a new service, which is laid but not connected, the Licensee shall be entitled to recover from the applicant for whom the service has been laid minimum charges/fixed charges, as the case may be, as prescribed under the Licensee's 'Schedule of Tariffs' from the expiry of a period of three months from the date of the Licensee's communication in writing to the consumer that his supply is ready for commencement in the cases of low and medium voltage consumers and one month in the case of high voltage and extra high voltage consumers. Arrears of all such charges, if any, will have to be settled by such consumers before the Licensee commences the supply to such services. Without prejudice to the rights of the Licensee to recover Minimum Charges/Fixed Charges for new services which are not connected as aforesaid within the stipulated period, the Licensee shall be entitled to remove such services if they remain unconnected for a period of six months from the date of their laying. However, before the removal of such services, the Licensee shall serve a prior notice on the consumer of at least seven days' duration. The Licensee shall also be entitled to recover from the consumer the cost of removal of such a service as also the proportionate entire cost of the laying of the service which the Licensee may have incurred originally.

17. Payment of bills-

- a) Bills rendered to all consumers other than
- i) high voltage and extra high voltage consumers and
 - ii) low voltage and medium voltage consumers with connected load exceeding 15 brake horse power,

shall be paid at the Licensee's office within 14 days from the date thereof. Payment against bills for the supply of energy (which may also include any of the charges recoverable from the consumers under Part II of the Miscellaneous Charges of these Conditions of Supply) will also be accepted at the Licensee's various payment centres.

- b) All bills rendered to
- i) high voltage and extra high voltage consumers
 - ii) low voltage and medium voltage consumers with connected load exceeding 15 brake horse power, and
 - iii) low voltage and medium voltage consumers taking supply for cinemas and theatres.

shall be paid at the Licensee's office within 15 days from the date thereof failing which interest at 24 percent per annum will be charged on such bills from the 15th day after the date of the bill to the day of actual payment without prejudice to the Licensee's right to take action under sub-condition (d) herebelow.

(c) Any complaint with regard to the accuracy of the bills shall be made in writing to the Licensee and the amounts of such bills shall be paid 'under protest'. Such payments will be regarded as advances to the credit of the consumer's account until the bills in dispute have been finally settled.

(d) If the consumer fails to pay his bill, the Licensee shall be at liberty to take action under sub-section (1) of section 24 of the Act, and to cut off the supply after giving such consumers not less than seven clear days' notice in writing, which may be incorporated in the bill itself or served separately, without prejudice to the Licensee's right to recover the amount of the bill by suit. Where, however, any difference or dispute which by or under the Act is required to be determined by the Electrical Inspector, Government of Gujarat, has been referred to the Inspector under intimation to the Licensee before notice as aforesaid has been given by the Licensee, the Licensee shall not be at liberty to cut off the supply for failure to pay the bill except where the Licensee has made a request in writing to the consumer that the amount in dispute should be deposited with the Electrical Inspector, Government of Gujarat, and the consumer has failed to comply with such a request.

e) All payments, which are received from the consumers towards energy dues, will be first adjusted against the earlier outstanding dues (inclusive of interest), if any.

f) A consumer must present the latest bill rendered to him at the time of payment without which the payment will not be accepted. If the consumer is unable to do so or if he has lost the bill, a duplicate bill or paying-in-slip giving only the total amount shall be supplied to him by the concerned Zonal Office of the Licensee.

g) The Licensee cannot guarantee that the supply of a consumer will not be disconnected for the non-payment of the consumer's energy bill inclusive of past arrears even if the consumer may have paid the said bill on the same day prior to the disconnection of supply. The date and amount of the receipt of payment of the relevant bill, issued by or on behalf of the authorised representative of the Licensee only, shall be treated as conclusive proof of the date and amount of such payment.

h) Consumers desirous of depositing an amount with the Licensee for adjustment towards their periodical energy bills may do so after filing their intention in writing and stating the amount they desire to deposit. The Licensee will accept such deposit, carrying no interest liability, as a matter of affording convenience to the consumers, but does not accept any responsibility arising out of non-communication to the consumer of the balance to his credit from time to time. It will not enter into any correspondence on the subject with the consumer except for reflecting the position of the energy consumption account of the consumer in the periodical energy bills of the consumer, which will be sent to the consumer by ordinary post to the address desired by him. Accordingly, this facility to the consumer shall not absolve the consumer from his obligations under Condition No.13 of Part I of these Conditions of Supply towards the Licensee.

18. System of supply-

Supply of energy shall be given by the Licensee on one of the following systems, the respective voltage mentioned below being measured at the point of delivery of supply.

c) High Voltage- Alternating current, three phase, 50 Hertz, 11000 volts between phases.

d) Extra High Voltage- Alternating current, three phase, 50 Hertz, 66000 volts between phases.

NOTE- i) Supply of energy under (a) and (b) above shall be given from medium pressure distributing mains;
ii) the voltage at which supply is delivered will be subject to the tolerances permitted under the Indian Electricity Rules, 1956.

19. Classification of installations:-**ALTERNATING CURRENT SYSTEM**

a) Two wire single phase, 230 volts:

1. General supply not exceeding 3 kilowatts of requisitioned load.

d) Three wire three phase 11,000 volts between phases. Bulk supplies having maximum demand exceeding 100 kilowatts/100 kilovolt amperes.

e) Three wire three phase 66,000 volts between phases. Bulk supplies having maximum demand exceeding 4 megavolt amperes.

20. GENERAL CONDITIONS :-

a) Mains- The consumer's mains shall in all cases, be wired upto the Licensee's point of supply enabling the Licensee to locate the latter at a convenient place and height from the normal floor level, and leaving sufficient cable/wire for connecting up with the Licensee's apparatus.

b) Switches and fuses-

- i) Main switch and single fuse on the conductor other than the neutral conductor in the cases of low and medium voltage supplies :- The consumer shall provide proper linked quick break main switches of requisite capacity to carry and break current in each conductor near the commencement of supply. All the consumer's switches should be on the live wire and the letter 'N' should be painted on the wooden board directly underneath the neutral conductor where it leaves the consumer's main switch for connecting to the meter. No single pole switch or cut-out should remain inserted in any neutral conductor.
- ii) High and extra high voltage supplies -The consumer shall provide and connect between the Licensee's point of delivery of supply and the transformer a dust and vermin proof switch or circuit breaker of adequate rupturing capacity together with suitable protective gear as required under Rule No.50 of the Indian Electricity Rules and approved by the Licensee.

c) Balance of installations- If the installation is required to be wired on three phases, wiring will be done on the group system, separate neutral wire being brought back in each case to the consumer's Mains Switch. An approved type of double pole linked switch shall control each main circuit. The lamps, fans or any other apparatus of which the installation consists shall be so grouped that under normal working conditions the current in the three phases will be balanced and very little current will flow in the neutral wire. All welding transformers above two kilovolt amperes rating shall be provided with three phase balancing equipment.

d) Licensee's apparatus and consumer's switch.

- i) Low voltage supply- The Licensee's meter board and the consumer's switches at the point of supply should be located at a clean place where they would not be exposed to sun, rain, dripping water, vermin, excessive dirt and chemical corrosion.
- ii) Medium voltage supply- With medium voltage supply, i.e. above 250 volts and upto 650 volts, the Licensee's meter and service cut-outs shall be enclosed in a strong box suitably ventilated and provided with a hasp, staple and seal or lock. The meter box and consumer's switches should be located at a clean place where they would not be exposed to sun rain, dripping water, vermin, excessive dirt and chemical corrosion. All wires between which a difference of potential of over 250 volts exists shall be made inaccessible to unauthorised persons or enclosed in an earthed metallic casing or conduit. A 'Caution' board printed in Hindi or English and Gujarati shall be fixed thereto.
- iii) High and extra high voltage supply- The consumer shall provide and maintain at a site in his premises approved by the Licensee a suitable dry, well lighted, ventilated

and fireproof building to be used as a Transforming Substation which shall be constructed and arranged by him in all respects to the reasonable requirements of the Licensee who will lay his mains and cables and provide and erect his switchgear and meters in that substation to afford control by him of the supply and to measure the same. The Licensee shall be entitled to make use of his apparatus, mains and cables, and to make reasonable additions thereto in order to afford supply to other consumers.

- iv) In the event of the Licensee's apparatus and other property on the consumer's premises being damaged, lost or destroyed by reason of or through any act, omission or default on the part of the consumer, all loss directly or indirectly arising therefrom shall be paid for by the consumer to the Licensee.

(e) Aerial mains - In order to save the expense of a long underground service on private property, a consumer may, with the Licensee's approval erect a suitable dry and ventilated pillar with provision for locking on that portion of his property which is nearest to the Licensee's supply mains into which the service shall be laid and from which the consumer may run overhead mains to his premises. This overhead mains shall constitute a portion of his installation and shall be laid in compliance with the Indian Electricity Rules, 1956. An efficient choking coil and lightning arrester may be fixed at the commencement of the overhead line at the consumer's cost should he desires the same, as an additional protection for his installation.

f) Earthing- Gas pipes and water pipes or any other metallic structure on the premises shall on no account be used for earthing purposes. All wiring shall be kept as far away as possible from gas and water pipes.

g) Domestic appliances- All appliances used must be effectively earthed. The minimum size of earth wire permitted is 14 standard wire gauge or 3 square millimetre copper or equivalent.

h) Plugs - All plug sockets on low voltage installations shall be of the three pin type and the third pin shall be permanently and efficiently earthed. Single pole switches controlling plugs shall be inserted in the live wire and not in the neutral wire.

i) Wiring- Single leads shall not be run separately in iron conduit.

j) Alternating Current motor installation- Each motor shall be provided with control gear so as to prevent satisfactorily the maximum current demand from the consumer's installation exceeding the limits given in the following schedule at any time under all possible conditions. Failure to comply with these regulations will render the consumer liable to disconnection from the supply on account of interference with the supply to other consumers :-

| Nature of Supply | Size of Installation | Limit of maximum current demand |
|------------------|--|--|
| Single Phase | Upto and including 1 brake horse power | Six times full load current |
| | Above 1 brake horse power and upto and including 1.5 brake horse power | Four times full load current. |
| Three Phase | Above 1 brake horse power and upto and including 10 brake horse power | Three times full load current |
| | Above 10 brake horse power and upto and including 15 brake horse power | Twice full load current. |
| | Above 15 brake horse power | One and a half times full load current |

Three phase motor circuits shall be controlled by a triple pole switch protected by a no-volt release and three phase fuses (or overload release). It is important that the release should be maintained in thorough working order. Wiring for motors shall be run with all phase wires bunched in a single metallic conduit, which shall be efficiently earthed throughout and connected to the frame of the motor from which two separate earth wires shall be run. The minimum size of the earth wire permitted is 14 standard wire guage or 3 square millimetre copper equivalent. All motors shall comply in every respect with the Indian Electricity Rules, 1956 in force from time to time.

Motors above 1.5 brake horse power shall be wound for 3 phase. No three pin plug sockets shall be used for connecting such 3 phase motors.

k) Power factor of installation- It shall be incumbent upon the consumer to maintain an average power factor of not less than 85% in respect of his installation. To achieve this, the Company shall not commence to give power supply to any applicant requiring motive power at low tension for agricultural or for any other purpose if the total load of his installation is 7.1/2 BHP or more unless such installation, is provided with a suitable and adequate power factor corrective equipment like the shunt capacitors.

For this purpose, the applicant requiring supply for motive power shall procure his own shunt capacitor of adequate rating at his cost and shall install it after getting the same tested by the Company on payment of the testing fee failing which power supply shall not be released.

The non-release of power supply due to non-provision of the capacitor for his installation shall not absolve the applicant from his liability for the payment of the minimum charges or the minimum guarantee as the case may be, if the Company is otherwise ready to give power supply and has served a notice to that effect.

upon the applicant.

The shunt capacitor equipment installed by the applicant/consumer shall be and remain the property of the applicant/consumer by whom it shall be maintained and in case the capacitor installed is damaged or found missing, the same shall be replaced by the consumer at his cost.

This will also apply to the consumer requisitioning for additional power supply where the total load including the load requisitioned for becomes 7.1/2 BHP or more.

In the case of existing installation including motive power installations below 7.1/2 BHP the Company reserves the right to refuse or disconnect power supply to such installation where the average power factor, in the opinion of the Company is less than 85%.

1) Installation of captive power plant/generating sets

Permission of the Licensee shall be obtained before installing any captive generating set in any premises within the supply area of the Licensee. Permission of the Chief Electrical Inspector to Government should also be obtained. This is to ensure that these generating sets do not inadvertently feed into the electric supply system and cause damage to Licensee's property or injury to Licensee's personnel. Violation of this rule will entail immediate disconnection of supply of electricity to the installation and recovery of cost of damages.

In addition to above, Gujarat Electricity Board's prior permission is necessary and for running the generating set in parallel with the Licensee's system, prior permission of Licensee shall be necessary.

21. Restriction on use of electricity - Notwithstanding anything contained in any agreement/undertaking executed by a consumer with the Licensee or in the tariff applicable to him, the consumer shall restrict the use of electricity in terms of his maximum demand and/or energy consumption in the manner and for the period as may be specified in an order that may be made by the State Government or the Licensee pursuant to the powers vested in them under any law in force from time to time.

22. Malpractice - a) Malpractice shall mean contravention by the consumer of any of the provisions of the Act, the Electricity (Supply) Act, 1948 or the Indian Electricity Rules, 1956 or of any other law governing the supply and use of electricity and the rules framed thereunder as also contravention of any of the provisions of the Licensee's "Conditions of Supply and Miscellaneous Charges" or any of the terms and conditions of any agreement governing the supply of electricity by the Licensee to the consumer and shall in particular include the following cases

i) Supply of electricity by a consumer without the permission of the licensee to any other person or premises whose supply to service has been disconnected by the Licensee for any reason or for which the service was originally provided by the Licensee and subsequently removed.

ii) The drawal of power by the consumer in excess of his contract demand without the specific permission of the Licensee.

iii) Unauthorised addition or alteration of, or extension to the consumer's electrical installation without the permission of the Licensee.

iv) The use of Licensee's supply by the consumer under a higher method of charging than that under which the supply was originally made available to the consumer.

v) Capacitors once installed when found to have been removed from the installation.

b) In the cases of unauthorised additions, alterations or extensions carried out by low voltage and medium voltage consumers to their electrical installations without the permission of the Licensee, the Licensee shall be entitled to recover from the consumer additional charges retrospectively for such unauthorised additions, alterations or extensions as prescribed under item No.12 of Part II of these Conditions of Supply together with incidental charges. Payment of such charges shall not entitle the consumer to continue to use unauthorised load in future as a matter of right.

c) Without prejudice to the rights of the Licensee to initiate legal proceedings against any person found to be committing any of the malpractices mentioned above, the Licensee shall be entitled to disconnect the supply of such a consumer. The supply shall not however be reconnected unless the consumer has qualified for reconnection by removing the cause of disconnection and settled the charges as per item (b).

23. a) Theft of energy - Malicious wastage or diversion of energy - Interference with meters or Licensee's works.

Under the Indian Electricity Act, 1910, the following acts are offences which are punishable with imprisonment or fine or both as prescribed under different sections as follows :-

| 39 A | Abetment of offences punishable under section 39 and section 44 of the Act | Same punishment for abetment as for the offence |

b) Without prejudice to the Licensee's rights to initiate legal proceedings against any consumer or person found to be committing any of the offences mentioned under sub-item (a) above, the Licensee shall be entitled to disconnect the supply of a consumer or person and to recover from him such charges as are assessed by the Licensee as provided for under item No. 11 of Part II of these Conditions of Supply and Miscellaneous Charges. The supply to the service will be kept disconnected for a period of 30 days from the date of disconnection on the ground of offences mentioned under sub-item (a) subject to review by Competent Authority or until the amount so assessed against theft of energy is paid by the consumer, whichever is later.

24. 'No Objection Certificates' from the Gujarat Air and Water Pollution Board-

In the cases of power supply for new connections or additional load for industries listed below, the consumer shall have to produce a 'No objection certificate' from the Gujarat Air and Water Pollution Control Board to the effect that the norms laid down by the Gujarat Air and Water Pollution Control Board have been complied with by the consumers.

i) In the cases of all low and medium voltage consumers or persons committing the offence, the designated Assessing Authority shall not be below the rank of an Engineer and in the cases of high voltage and extra high voltage consumers, the designated Assessing Authority shall not be ordinarily below the rank of a Senior Engineer.

ii) The Assessing Authority shall carry out the assessment in accordance with the guidelines laid down in this behalf by the General Manager (Commercial) in consultation with the Chief Electrical Inspector from time to time, taking all the relevant factors into account including the actual connected load found existing at the consumer's premises at the time of the detection

of the offence, the use of energy being put to and the type of premises wherein the load was being used, the past consumption record at the consumer's service, etc.

However, if any amount has already been billed in normal course to the consumer for Billing Demand in excess of the Contract Demand for any billing period forming a part of the assessment period, due adjustment will be allowed for such amounts while determining the additional Fixed Charges payable by the consumer or person under this sub item.

v) The total value of energy, assessed as mentioned above, shall be exclusive of the charges for consumption recorded by the meter as also the Government taxes and levies, as applicable, from time to time, which will be separately charged on the value of the energy so assessed.

These incidental charges will also be in addition to all other charges, which may be recoverable from the consumer or person under Part II of the "Conditions of Supply", as also taxes and other levies payable by the consumer to the Government, as may be in force from time to time.

i) The "Assessment Period" shall be the period commencing from the date on which the consumer's installation was last inspected, tested and approved by the Licensee's authorised representative and ending on the date on which the unauthorised addition, alteration or extension was detected, subject to the condition that such assessment period shall not exceed a period of six months.

ii) Even if for a part of the consumer's consumption of energy, a higher tariff rate would have been applicable at the time of the detection of the offence, had the addition, alteration or extension been carried out authorisedly, the entire consumption of energy during the assessment period shall be charged under the higher tariff rate unless it is proved that the consumption chargeable at the lower tariff rate has been entirely and separately metered.

iii) For motive power loads found connected in excess of the sanctioned loads, additional Fixed Charges will be leviable on such excess loads for the relevant assessment period as provided under item No.11(1)(iv) of Part II of these "Conditions of Supply & Miscellaneous Charges".

iv) The total value of assessed charges as mentioned above shall be exclusive of all Government taxes and levies as are applicable thereon from time to time, which will be charged separately.

The said Appellate Authority may reduce the value of the assessment, at his sole discretion, if the consumer is able

to satisfy him that such reduction is justified looking to the facts and circumstances of the case, provided that the consumer lodges his appeal with the Appellate Authority within 10 days from the date on which the Assessing Authority had determined the value of assessment.

ii) No appeal, however, shall lie with the Appellate Authority unless the consumer has paid the amount equivalent to at least 60% of the value of energy assessed by the Assessing Authority in cases where he desires to have his supply reconnected soon after the detection of the offence. If such reconnection is not desired, the condition precedent for the lodging of appeal with the Appellate Authority shall be the payment of at least 20% of the value of the assessment originally done by the Assessing Authority.

iii) The Appellate Authority shall give his final decision on the appeal lodged by the consumer with him within 30 days of the lodgment of such an appeal. Thereafter, the balance amount, if any, recoverable from the consumer or refundable to him as the case may be, as per the decision of the Appellate Authority, shall be accordingly dealt with within seven days of the date of the order of the Appellate Authority.

Dehusked grains are the rice kernels whole or broken which have more than $\frac{1}{4}$ th of the surface area of the kernel covered with the bran and determined as follows :-

ANALYSIS PROCEDURE:- Take 5 g. of rice (sound head rice and broken) in a petridish (80x17 mm) Dip the grains in about 20 ml. of methylene blue solution (0.05% by weight in distilled water) and allow to stand for about 1 minute. Decant the methylene blue solution, Give a swirl wash with about 20 ml. of dilute hydrochloric acid. (5% solution by volume in distilled water). Give a swirl wash with water and pour about 20 ml. of metanil yellow solution (0.05% by weight in distilled water) on the blue stained grains and allow to stand for about 1 minute. Decant the effluent and wash with fresh water twice. Keep the stained grains under fresh water and count de-husked grains. Count the total number of grains in 5g. of sample under analysis. Three broken are counted as one whole grains.

Calculations: % of Dehusked grain $\frac{N \times 100}{W}$

Where N - Number of de-husked grain in 5g of sample and
W - Total grains in 5g. of sample.

4. Inorganic foreign matter shall not exceed 0.5% in any lot, if it is more, the stocks should be cleaned and brought within the limit kernels or pieces of kernels having mud sticking on the surface of rice, shall be treated as inorganic foreign matter.

5. In case of rice prepared by pressure parboiling technique, it will be ensured that correct process of parboiling is adopted i.e. pressure applied, the time for which pressure is applied proper gelatini-sation, aeration and drying before milling are adequate so that the colour and cooking time of parboiled rice are good and free from cancrustration of the grains.
